1. Datasheet

Solution data	
Name	ARIS (Architecture of Integrated Information Systems)
Result type	Modelling tool
Description/functionality	ARIS is an enterprise modelling tool. The Architecture of Integrated Information Systems (ARIS) supports the modelling of Event-driven Process Chains (EPC).
Benefits to interoperability	-
Supported models/methodologies	<ul style="list-style-type: none"> Event-driven Process Chains
Supported input interfaces	-
Supported output interfaces	-
Validation/demonstration	-
Standards compliance	-
Availability	-
License	Commercial
Status	Commercial
Requirements and dependencies	-
Web references	<ul style="list-style-type: none"> Website: http://www.ids-scheer.com/international/english/products/53961
