Solution data	
Solution name	MPCE (Modelling Platform for Collaborative Enterprises)
Result type	Modelling platform
Description/functionality	The Modelling Platform for collaborative enterprises (MPCE) supports the POP* language and provides model management and model exchange services. The MPCE can be used as a web-service hosted somewhere or can be locally installed.
Benefits to interoperability	Across this infrastructure organizations are able to exchange and share process models, translating between the proprietary languages of the different tools. The key parts of this infrastructure are • Enterprise Knowledge Architecture (EKA), a modeling framework and XML schema for representing any kind of enterprise models and enterprise modeling languages, • MPCE web services that tools use to access models in the repository.
Supported models/methodologies	-
Supported input interfaces	-
Supported output interfaces	-
Validation/demonstration	The INTRACOM PPM pilot.
Standards compliance	-
Availability	-
License	-
Status	-
Requirements/dependencies	-

Contact person	Håvard D. Jørgensen, AKM

Contributors	Other partners contributing to the result
Provided by project/activity	• A1 – Enterprise Modelling in the Context of Collaborative Enterprises
Deliverables representing result	D.A1.5.2 "Collaborative Modeling Platform – 1st Prototype"
Contribution to key result	• 9. Collaborative Enterprise Modelling Platform
Used in pilot	INTRACOM: Product/project portfolio management
Deliverable providing evaluation	D.A1.6.1 "Benefit-Assessment" (M24)
